

Polished Material
Let it shine

BOLLINGHAUS[®]
STEEL

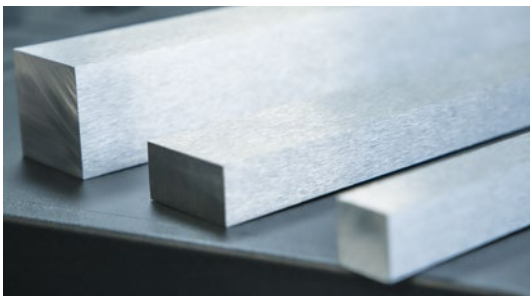

High Quality

Q

FOR EVERY PURPOSE

polished profiles ...

... for various applications

e.g. food production

e.g. pharmaceutical industry

Make your ornamental, high purity or sanitary projects shine

The polished material is typically used in applications such as food packaging machines, architectural panels, elevator cabs, faucets and hand rails – just to name a few. Our polished products can unlock interesting opportunities, from both an engineering and commercial perspective. Compared to hot rolled and cold drawn surface finishes, our polished materials offer an even broader variety of benefits in the eyes of the customer that ultimately make these value-adding services worth investing in.

Polished products in various grades:

1.4307 / AISI 304L

1.4305 / AISI 303

1.4404 / AISI 316L

1.4571 / AISI 316Ti

1.4021 / AISI 420

Other grades on request.

Surface finish:

GRIT 80 – GRIT 400

Shapes:

FLAT, SQUARE, HEXAGON

From one-sided to all-sided polishing service:

HR & CD Flats: width 15–130 mm,
thickness 10 – 55 mm

HR & CD Squares: 15 – 80 mm

CD Hexagons: 17 – 70 mm

Polishing acc. to requested size
tolerances up to EN 10278/h11
